Re: Letter of Conditional Support for Canfor Pulp Limited Partnership Odour Reduction Project – *Pulp and Paper Green Transformation Program*

PACHA, the Peoples Action Committee for Healthy Air, Prince George offers conditional support for the Odor Reduction project that is being initiated by Canfor. We believe that the funding for this project by the Federal Government through the Pulp and Paper Green Transformation program will probably not only benefit Canfor but will also be of significant benefit to the community of Prince George through the proposed reductions of emissions. PACHA looks forward to obtaining copies of the Environmental Impact statements so that we can assess the data. We hope that at that time we will be in a position to provide our full support for the projects.

We would also like to extend a thank you to Canfor for the recent face to face meetings that have taken place in October and November of 2009 in which members of the community were able to express their concerns about air quality issues in our community and to discuss Canfor's proposals for Green transformation projects. We believe that these meetings were a step in the right direction and look forward to future improved communication with Canfor.

Sincerely

Dave Fuller
President
Peoples Action Committee for Healthy Air - Prince George

Pacha is a grass roots organization of over 1100 members whose mandate it is to promote cleaner air in Prince George for more information please go to our website www.pachapg.ca
