**Re: Letter of Support for Canfor Pulp Limited Partnership
Northwood Pulpmill Green Transformation Project**

To Whom It May Concern:

Prince George air quality is an ongoing concern for many CEP Local 603 members and retirees so I am especially pleased to write this letter on behalf of the Sisters and Brothers of Local 603 in support of the Green Transformation project at CPLP's Northwood Pulpmill.

The recovery boiler low odour project will have a positive impact on the airshed in our area with significant reductions in both particulate and TRS emissions. It is our hope that these reductions will improve the quality of life for many Prince George residents.

We are also pleased that CPLP intends investment in addition to the Green Transformation funds announced. This commitment to our operation bodes well, not only for the members of 603, but also the local economy as the viability of the Northwood operation improves and positions itself for further opportunities.

Sincerely,

Brian Lakanen
President, CEP Local 603
