Dear Ms. Waddell,

Re: Support for the Northwood Pulpmill Green Transformation and the PGI Mills Green Transformation projects

Thank you for meeting yesterday with the UNBC President's Executive Council to present the details of the Canfor Pulp Limited Partnership (CPLP) Northwood Pulpmill Green Transformation and the PGI Mills Green Transformation projects. This is welcome news for Prince George and for the entire Region.

The odour and particulate reductions will have a significant impact on air quality. This will enhance our ability to attract and maintain the professionals and skilled workers that make up a well-rounded, full service community. We are pleased to learn that CPLP intends to conduct a comprehensive evaluation of the ambient levels of both air contaminants to compare results before and after commissioning and look forward to playing an active role in this important study.

The significance of these projects for the long term viability of the pulpmills and as an economic stimulus during the construction phase is quite considerable.

We fully support both of these projects and look forward to the range of environmental and economic benefits to the Region.

Sincerely,

George Iwama, PhD
President and Vice Chancellor
